METAL WORKERS OF LOS ANGE- ishment for a criminal offense. LES WENT OUT YESTERDAY IN AN EFFORT TO GET A GEN-ERAL \$4 A DAY WAGE.

[UNITED PRESS LEASED WIRE.] Los Angeles, Calif., June 2 .- Of- guished consideration." ficials of the Metal Workers council declared today that 1,500 men have joined the strike which went into effect yesterday.

They predict before the end of the week practically all of the 2800 workmen connected with their craft in the city will have left work.

Managers of the several foundries and iron works affected are firm in their statement that the number of strikers does not exceed 500. They profess to feel certain that the men will return to work next week.

The strike was called following the reported refusal of the foundrymen to consider demands of their employes for a general \$4 a day wage, and a worlking day of eight hours.

It was voted at a meeting of the local metal workers council Tuesday

Thinking that fight over today, I don't know how I could have handled my end of it better. I was cautious all the way, always stood up to Fitzsimmons where he could punch at me, but never lost my head either when he was rushing me hardest or when I had him going. I had planned to use my crouch in a way that would puzzle him and make it hard to reach either my chin or my stomach, and I didn't change my plans in the ring. I had planned to beat him down with body punches as he rushed at me, and I carried that through the fight. The body punches sapped Fitzsimmous

My condition could hardly have been better, although I believe I was drawn a little too fine and might have felt it if the fight had gone much longer. I had an idea then a fighter should have thin legs, just because Corbett and Fitzsimmons had thin legs. So in training I ran my legs pearly off on the road. They were thin. I was too tine, I think, for I weighed less than ever before or since in the ring. I scaled only 204 pounds stripped. Afterward I made up my mind never to with more of my untural weight on I

had more speed and strength. Fitzsimmons, I judge, must have weighed about 170 pounds. Just before the fight Julian wanted to announce Bob's weight as 158 pounds, because he still claimed the middleweight as well as the heavyweight championship. been worth a nickel if I had lost.

The night after the light I was to box an exhibition with Jim Daly at the Philadelphia Academy of Music. I hardly showed a mark from the battle with Fitzsimmons. My knuckles were swollen a tittle from pounding him, and there was a small strip of plaster on my eyebrow, but the cut there didn't amount to anything. My shoulders were stiff from the work I had done. I slept until 10 o'clock in same train when I boarded it with my brother Jack, Billy Delaney, Billy Brady and Tommy Ryan, but I guess the ex-president didn't see so much as a porter that day. Everybody connected with the railroad was in my car. At Jersey City, after crossing the Twenty-third street ferry, there was had to send me up a freight elevator at the depot to get away. On the 27th of July, a month and a half or so after beating Fitzsimmons, I went to England. Billy Brady and my brother Jack were with me. It was my first long trip away from my own country.

In one round Jack and I jumped at each other and slugged all over the stage, and then the English cheered their heads off. They kept calling us out again and again until I got tired.

A few days later it was announced that I'd meet all comers. The first man sent up against me was George Crisp of Newcastle. George explained that he "jolly well knew what chance he had, but he needed the money." He didn't put up much of a fight, so after two rounds I called Jack in and finished the bout with him to make it more interesting.

The next English fighter I met was Arthur Morris. Arthur was a stonemason. They'd told terrible stories about his strength.

Morris wrapped his head in his arms and backed away several times when get so low again, and, I found that I feinted.
